

Anatomical grips for air-, sport- and free pistols

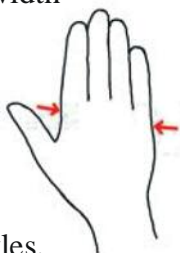

With three unequalled benefits:

- With the **new palm rest** you can adjust exactly the grip width, with your hand in the grip.
- **5 grip parameter** (size, side, form, angle, volume) make it possible to find the optimum grip for you.
- On our free pistol grip you can **adjust the back hand support** to the current thickness of your hand.

5 sizes are available:

Size

- XL**100 mm hand width
- L**95 mm “
- M**90 mm “
- S**85 mm “
- XS**80 mm “

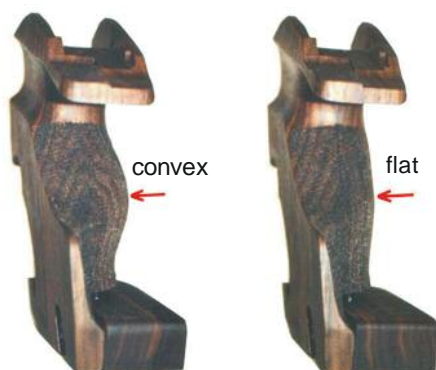

The hand width should be measured across the knuckles, without the thumb.

Side

All grips are available for **right or left handed shooters** (without extra charge)!

Form

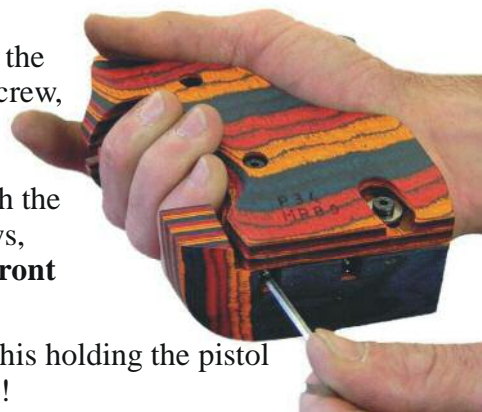

To fill the hand completely, you have the choice between a:

- **convex** (for a normal men's hand) or a
- **flat** (for short or big hands) **palm area.**

Adjustable palm rest

After loosen the lateral jam screw, **infinitely adjust** the palmrest with the two setscrews, **separately front and rear.**

You can do this holding the pistol in your hand!

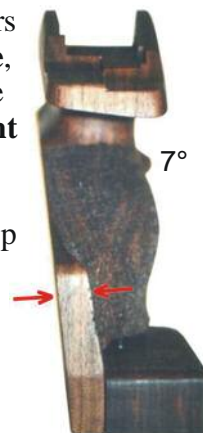

Angle

The lateral grip angle of the **0°-version** of our grips is calculated so that the shooter can reach behind the gun, with **barrel axis and forearm forming a line.**

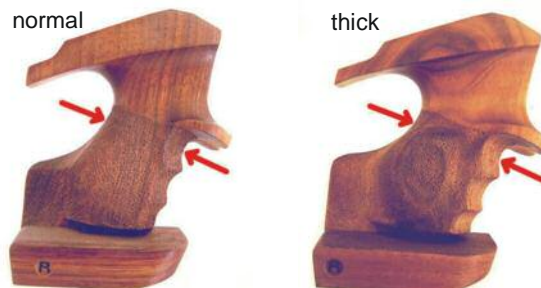

Some shooters may have problems holding the pistol this way, due to anatomical reasons:

For right-handed shooters **aiming with the left eye**, or for shooters who have steady a **left angled front sight**, all grips are also available in a **version angled 7°** around the grip axis towards the trigger finger.

This angling is also beneficial for **shooters with short fingers.**

Volume

For shooters with **disproportionately long hands** the grips are also available with a **thicker volume.** With it the hand is **5mm back**, so the **trigger finger doesn't reach so far into the trigger area.**

Adjustable grips for free pistol are fit out in addition to the adjustable palm rest with an unequalled adjustment for the back hand support.

With it you can infinitely adjust the grip to the current thickness of your hand.

For TOZ35, Hämmerli 150 and FP Puff **fore-ends with weights** are available, matched to the wood of the grip.

Order form for Rink-grips

for sport pistols:

160,-€*

- Walther SSP
- Walther GSP (also Expert)
- Walther GSP76 (before 1976, lateral screws, with safety catch)
